---

Dear Gloria,

As I mentioned in my voicemail, I would like to suggest the attached draft of a Correction Deed Notice, with attachments and EPA authorization letter for your signature, all of which would be filed as a package in Boone County.

I am copying the others I assume would be involved in concurrence or as a heads-up.

The legal description of the affected land at Arkwood is taken directly from the Consent Decree of 1987 governing this matter.

The form of the Correction Deed Notice is taken directly from the original Deed Notice as approved by EPA for recording in Boone County, with just the substantive changes made and called out.

I have transcribed the description carefully, but I will continue to check and re-check its exactitude so it will be identical to the Consent Decree description before being finalized.

The Consent Decree describes the Arkwood, Inc. site as "containing 18.076 acres more or less." This should make matters quite clear.

As you know, Casey can't complete the determination of Ready for Reuse until the Deed Notice is corrected by recording a Correction Deed Notice, because that was the one deficiency in the Third Five-Year Site Review.

So this matter is urgent for my part.

I hope you will be able to expedite the concurrence process by using the attached draft instrument with attachments which I submit as a package for your review and correction.

I am also attaching for your reference a scan of the current Deed Notice as recorded.

Thank you,

Curt
